INTRODUCTION

This manual provides information for the Model QT-5 reciprocating compressor, per Record of Change 104.

The Model QT-5 is an aircooled, two stage, two cylinder, splash lubricated compressor, with up to 175 p.s.i. continuous pressure capability. It has a 4" low pressure bore and a 2.25" high pressure bore, with a 2.88" stroke. This compressor can be run at 400-1060 r.p.m.

A hooded air filter/silencer is available as an option, as well as head unloaders.

CHANGES

since previous printing dated December 1994:

- QUIN-CIP oil information was added
- piston rings were changed in the low pressure piston group
- cylinder & head groups were changed
- updated control groups were added
- unit parts information was added

MODEL & SERIAL NUMBER IDENTIFICATION

Record
of
Change No.

MODEL	
SERIAL NO.	
Coltec Industries Quincy Compressor Division	

**Model & Serial Number
Identification Tag**

The model & unit serial number identification tag is located on the air tank top plate.

Serial Number <hr style="width: 80%; margin: 5px auto;"/>
--

The basic compressor serial number decal is located on the handhole plate (oil gauge side of the crankcase). *Fill in the numbers from your compressor unit and basic compressor in the corresponding spaces provided here, and reference this page when ordering replacement parts.*

All replacement parts are to be ordered through an authorized Quincy Compressor Distributor. Insist on genuine Quincy parts only! Failure to do so may void warranty.

ORDERING REPLACEMENT PARTS

Prompt service can be rendered on repair parts orders if the following information is given:

- Item 1)** the model number, record of change number, & serial number.
- Item 2)** the exact part number needed. (Do not order by item numbers.)
- Item 3)** the exact quantity needed.
- Item 4)** the preferred type of transportation.

QUIN-CIP OIL

Refer to the chart below to order Quin-Cip compressor oil from your local Authorized Quincy Compressor Distributor.

Package	Part No.	Description
Barrel	112541D032	55 gal., SAE 10W
Pail	112541P032	5 gal., SAE 10W

Quart Case	112543C100	(12)-1 qt., SAE 30

CAUTION !

Follow all safety precautions outlined in the Quincy QT Series instruction manual.

WARNING !

Do not operate this compressor without a totally enclosed belt guard or any other required safety equipment.

DANGER !

Air used for breathing or food processing must meet O.S.H.A. 1910.134 or F.D.A. 21 C.F.R. 178.3570 regulations. Failure to do so may cause severe injury or death.

CYLINDER GROUP 111147

Item Number	Qty.	Part Number	Description
1	1	111119-1	cylinder / crankcase
2	2	123157-155	"o"ring, 3/32 wide x 4.19 o.d.
3	1	111332	bearing carrier
4	*1	111349	breather elbow
5	1	123157-112	"o"ring, 3/32 wide x .69 o.d.
6	16	123478-L11	hex. screw, 3/8-16 unc x .88, grade 5 (@ 30ft.-lbs.)
7	1	111108X	bearing carrier assembly
7.1	1	111108	bearing carrier, sheave end
7.2	1	111106	oil seal
8	1	123157-175	"o"ring, 3/32 wide x 9.19 o.d.
9	1	111109	oil pan
10	1	2057	pipe plug, 1/2 npt
11	1	110070-5	oil level gauge
12	1	111333	crankcase breather

@ Indicates torque value (dry threads).

CRANKSHAFT GROUP 111148

Item Number	Qty.	Part Number	Description
1	1	111120X	crankshaft assembly
1.1	1	111120	crankshaft (N.S.S.; order 111120X)
1.2	2	111107	ball bearing
2	1	111127	sheave, 14.15", 1 groove, B sect. ccw
3	1	111128-N14	hex. screw, 1/2-20 unf x 1.25, grade 5, LEFT HAND THREAD (@ 60 ft.-lbs.)
4	1	111129	washer

N.S.S. = Not Sold Separate

@ Indicates torque value (dry threads)

CONNECTING ROD & PISTON GROUP 111197

(low pressure)

Be sure to stagger ring gaps.

Pip marks indicate top surfaces
of item 7 (rings).

CONNECTING ROD & PISTON GROUP 111197

(low pressure)

Item Number	Qty.	Part Number	Description
1	1	111110	connecting rod assembly
1.1	1		connecting rod (N.S.S.; order 111110)
1.2	2	110511-K15	taptite screw, 5/16-18 unc x 1.50 (@ 20-22ft.-lbs.)
1.3	2	110428N031	flatwasher, 5/16
2	1	111431	low pressure piston
3	1	110190-013	piston pin
4	2	111105-001	piston pin plug
5	2	6591	oil ring rail
6	1	6590	oil ring expander
7	3	111330	piston ring
Maintenance Parts			
2	1	111431-010	low pressure piston (.010 oversize)
	1	111199	Piston Ring Set (standard) includes all rings necessary for installing standard size rings
	1	111199-010	Piston Ring Set (.010 oversize) includes all rings necessary for installing .010 oversize rings
	1	111431X	Piston Assembly, LP (standard) includes piston, ring set, piston pin & piston pin plugs
	1	111431X010	Piston Assembly, LP (.010 oversize) includes piston, ring set, piston pin & piston pin plugs
	1	110190-050	Replacement Piston Pin Assembly, LP includes piston & plugs

PILOT VALVES

110832 Series Pilot Valve (continuous run operation)
 Add dash # listed below to 110832 (per pressure setting) to obtain correct pilot valve.

Dash #	Load PSI	Unload PSI
-100	90	100
-997	*	30-70 adjustable
-998	*	71-150 adjustable
-999	*	151-175 adjustable

* Customer to set, see differential setting chart. Additional factory preset valves are available upon request.

110998 Series Pilot Valve (dual control operation)
 Add dash # listed below to 110998 (per pressure setting) to obtain correct pilot valve.

Dash #	Load PSI	Unload PSI
-115	100	115
-140	125	140
-165	150	165

Pilot Valve Repair Kit 110832-051
 Can be used to repair 110832 series pilot valves only. Customer must specify which spring when ordering repair kit.

Item #	Qty.	Part Number	Description
1	2		screen
2	1		filter
3	1		"o"ring
4	1	see chart below	pilot valve spring
5	1		ball

Differential Setting Chart		
Applies to 110998 series pilot valves only.

WARNING !
 Not all pilots are for use with all compressor systems. Make sure that the pilot you order is set within the safe operating limits of your compressor. Failure to heed this warning could result in an explosion.

SUCTION VALVE UNLOADER ASSEMBLIES

Description

The Quincy suction valve unloader assembly consists of unloading assemblies on the suction valves, having a plunger to contact the suction valve reed and an unloader pilot valve (110832 or 110998 series) to automatically regulate the passing of air tank pressure to the unloading arrangement.

Continuous Run Operation

Suction valve unloader assemblies are recommended for use on Quincy compressors where the compressor is to run continuously and a constant pressure is to be maintained. The purpose is to automatically unseat the suction valve of the compressor when the air supply is greater than the demand.

Unloading occurs when air tank pressure is sufficient to overcome pilot valve spring pressure. The check ball is then unseated, allowing air tank pressure to pass to the unloader assemblies. The compressor will run unloaded until the air tank pressure drops to a predetermined level. At this time, the action of the ball is reversed, shutting off air tank pressure to the unloader assemblies and venting the unloader to atmosphere. This allows the compressor to load. The drive, either electric motor or engine, runs continuously and must be started and stopped manually. 110832 series pilot valves feature a toggle lever which can be flipped to provide manual unloading.

Dual Control Operation

Dual control operation is designed to provide a choice between "start/stop" or "continuous run" operation. The 110998 series pilot valve can be set for "start/stop" operation by turning the knurled knob at the end of the pilot valve (*refer to illustration for 110998 series pilot valve*) clockwise until it stops. Under these circumstances, a pressure switch is required to stop the motor. Failure to use a pressure switch, with the pilot valve locked out, will result in unsafe conditions.

WARNING !

A pressure switch must be incorporated whenever 110998 series pilot valve is employed as part of the control system.

The compressor will operate in the continuous run mode if the knurled knob is turned counterclockwise until it stops.

Installation

The pilot valve is mounted directly into the air tank. Compressors in the field, not equipped with these controls, can be converted. Consult your local Quincy Compressor Distributor for assistance with conversion procedures.

Service

If a change in pilot valve operation is detected, remove the pilot valve from the air tank and check the screen in the inlet of the pilot valve for obstructions. Clean the screen if necessary.

Adjustment

The unloading pressure is adjustable and is regulated by turning the unload adjustment hex nut (*refer to pilot valve illustrations*). Turn the hex nut clockwise to increase and counterclockwise to decrease the unloading pressure.

The differential (difference between unloading and loading pressure) is set by turning the differential adjustment hex nut (*refer to pilot valve illustrations*). Increase the differential pressure by turning the hex nut clockwise - decrease by turning counterclockwise. Make all adjustments in small increments. Tighten the locknuts after adjustment.

DECALS

Decals

Item #	Qty.	Part Number	Description
1	1	110831	serial number & nameplate
2	1	127889-A	decals, CAUTION!, MANUAL
3	1	127889-B	decals, DANGER!, "Air from this...."

Overhaul Kit KQT5F (for gas engine driven models)			
Item #	Qty.	Part Number	Description
	1	111200	Piston Ring Set
	1	111199	Piston Ring Set
	1	111203	Gasket Set & "O"ring Kit
	1	111226X2	valve plate assembly, LP

	1	111227X2	valve plate assembly, HP
	1	110377E075	air filter element
	1	110190-013	piston pin
	1	110190-014	piston pin
	1	111333	crankcase breather
	1	111110	connecting rod assembly
	1	111111	connecting rod assembly

Head Kit KQT5A (for models without head unloaders)			
Item #	Qty.	Part Number	Description
	1	112713	Replacement Valve Assembly, LP
	1	112714	Replacement Valve Assembly, HP
	1	111146E100	air filter element

Head Kit KQT5C (for models with head unloaders)			
Item #	Qty.	Part Number	Description
	1	112713	Replacement Valve Assembly, LP
	1	112714	Replacement Valve Assembly, HP
	1	110377E075	air filter element

Head Kit KQT5E (for gas engine driven models)			
Item #	Qty.	Part Number	Description
	1	112713	Replacement Valve Assembly, LP
	1	112714	Replacement Valve Assembly, HP
	1	110377E100	air filter element

Gasket Set 111203			
Item #	Qty.	Part Number	Description
	1	111228-003	gasket, cylinder to valve plate
	1	111228-004	gasket, cylinder to valve plate
	1	111229-001	gasket, head to valve plate
	1	111274-001	gasket, head to valve plate
	1	111106	oil seal
	1	123157-112	"o"ring, 3/32 wide x .69 o.d.
	1	123157-115	"o"ring, 3/32 wide x 7.19 o.d.
	2	123157-155	"o"ring, 1/8 wide x 10.75 o.d.
	1	123157-175	"o"ring, 3/32 wide x 9.19 o.d.

Recommended Spare Parts			
Item #	Qty.	Part Number	Description
	1	110377E100	air filter element, (fits 110377S100 and 110377S101 air filters; optional)
or	1	111146E100	air filter element, (fits 111146F100 filter; for plain heads)
or	1	110377E075	air filter element, (fits 111549 filter, standard)
	1	112085	gasket set
	1	112713	valve assy. replacement kit, LP
	1	112714	valve assy. replacement kit, HP

TYPICAL UNIT REPAIR PARTS LIST

The parts listed here are for standard QT-5 (up to 175 p.s.i.) units and may or may not be applicable to custom built units. Check with your local authorized Quincy Compressor Distributor for parts that can be used for custom built units. Make sure the components you order are rated within the safe operating limits of your system. If you are doubtful about which components to order, contact your local Quincy Compressor distributor.

(QT-5 simplex - horizontal tank - electric motor)

Qty	Part Number	Part Number	Part Number	Description
	60 gal.	80 gal.		
1	113266-200	113268-200		tank (200 psi maximum operating pressure)
1	113274	N/A		top plate
1	2713	2713		tank drain valve
1	111136-075	111136-075		service valve
1	110514-200	110514-300		pressure gauge
1	110512-005	110512-005		pressure switch
1	110513-200	110513-200		pressure relief valve (in tank; 200 psi)
1	111089-215	111089-215		pressure relief valve (in discharge line; 215 psi)
1	111491	111491		check valve
4 ft.	110515-075	110515-075		discharge tube
2	110948-075	110948-075		ferrule/sleeve
